

Sriraamaaya namah

“The History of great Nation, Bharat is like it's Autobiography in which historians like Britishers and other foreigners fixed the times of important events with religious partial outlook and rough estimates based on imagination. Now, it is high time for us, to filter those fictitious descriptions with the strength of scientific evidences and reconstruct exact History and hand it over to the boys and girls of future generation. It is the dire necessity and also the sacred duty of ours-”

This is the opinion expressed by Dr. Vedavyasa in the introduction to his thesis on Mahabharatakala Nirnaya (fixing the date of Mahabharata). Recently our central govt. has taken steps to rebuild real history of the Nation and also prepared a plan for that. At the same time, some persons made it a point to abolish Hindu Sanatana Dharma. In this juncture, the essays by Dr. Sivaramakrishna Sarma play very important part. As a matter of fact, Maxmullar was at confusion when he had mistaken Chandra Sree Chandragupta and Maurya Chandragupta here as one and the same. It is a sad affair that though Kuppayya Pandita etc refuted, but, they did not care. Other foreigners like Colebrook etc deliberately twisted the contents due to which our History was made artificial on account of such misappropriations. The blind age crept in Indian History has got to be removed. This is not only dire necessity, but it is very harmful and not proper to Continue with The dark period as mentioned by Dr. Sivaramakrishna Sarma just in proper moment. Sree Sarmajee is participating in constructing real History of the Bharat. For that, I express my hearty Congratulations. I also very much wish that his investigations, with Research-outlook will continue further more with grand success.
